Disposal costs for deicing of aircrafts 2021/2022

Dear Sir or Madam,

with the start of the winter season 2021/2022 and the associated deicing operations we would like to inform you that Cologne Bonn Airport must ensure a professional disposal of the effluent deicing fluid (Clariant-water-mixtures) due to reasons of water protection.

The final disposal costs are not known before the start of the deicing season.

The currently valid prices for deicing, which you can find in our price list, do not include disposal costs. The disposal costs will be invoiced in the second quarter of 2022, according to a calculation to be carried out after the end of the deicing season.

Last season the apportionment amounted 0,5464 € per liter deicing fluid.

Kind regards
Cologne Bonn Airport
i. A.

Matthias Pietzak
